A stylized graphic of a tree with a brown trunk and branches. The leaves are represented by various colored circles (red, yellow, purple, orange, green) and splatters. A large red sun is positioned behind the tree. At the top of the tree, there are silhouettes of wind turbines and animals (deer, birds).

ECO
Internship

WWF is the world's leading conservation organization.

It was established in 1970 in Pakistan with the mission to stop the degradation of our planet's natural environment and to build a future in which people live in harmony with nature.

For the past four decades, WWF-Pakistan has been committed to providing quality environment education to raise awareness about the value and benefits of natural resources of Pakistan.

The Eco-Internship Programme

WWF-Pakistan launched the Eco-Internship Programme to engage youth in environmental conservation for a sustainable future. It also guides individuals towards greener practices in everyday life.

Objectives of the Eco-Internship Programme

-  Enable students to generate an insight into the interaction between organisms and their environment.
-  Create awareness of environmental challenges and inspire sustainable solutions for environmental conservation.
-  Broaden scope as responsible custodians of valuable natural resources.
-  Inculcate a sense of civic responsibility in individuals.
-  Provide an opportunity to become an official ambassador of WWF-Pakistan.
-  Skill development.

Testimonial

"During Eco-Internship we participated in an array of activities in which we learned much about the environmental condition of the world today. The internship covers a large range of topics in short time. It also allows us to learn about the environmental problems faced by our country today. We participated in the activities first hand and learnt directly from the specialists. In the end the Eco-Internship program was extremely informative and interactive".
